EDUCATION

Queen's University <i>Bachelor of Computing (Honours.) in Computer Science</i> Relevant Coursework: Data Structures, Algorithms, Operating Systems, Artificial Intelligence Awards: Dean's Honour List	Sept 2019 – May 2024 Kingston, ON
--	--------------------------------------

PROFESSIONAL EXPERIENCE

Celestica <i>Data Analyst & Quote Controller Intern</i> - Facilitated spend data classification to correctly identify categories of spend, reducing unclassified spend by 30% - Improved ease of compliance by identifying critical contract terms and metrics to assist the transition between contract management systems, enabling greater visibility of contract terms - Built a PowerBI dashboard to enable senior management in evolving appropriate policies for effective management of employee travel expenses	May 2022 – Aug 2023 Toronto, ON
--	------------------------------------

OTHER WORK EXPERIENCE

Queen's University <i>Teaching Assistant</i> Courses: Linear Data Analysis, Advanced Data Analytics Responsibilities: Grading, Office Hours, Tutorial Session Mentoring	Jan 2022 – Apr 2022 & Jan 2024 – Apr 2024 Kingston, ON
Queen's University <i>Residence Don (Resident Assistant)</i> - Promoted academic success, addressed student needs, encouraged involvement among students in residence - Implemented and enforced university and campus policies - Conducted campus events to boost community engagement while maintaining student safety during the pandemic	Aug 2021 – Apr 2022 Kingston, ON
Walmart Canada <i>Customer Experience Salesfloor Associate</i> - Handled customer queries regarding online orders with emphasis on status and availability - Inventory collection for missing items in orders - Ensured clean and safe work environment during COVID-19	May 2020 – Dec 2020 Mississauga, ON

PROJECT WORK

Tracker CLI <i>JavaScript, Node.js, Commander.js, Inquirer.js, Moment.js, npm</i> - Built a Node.js CLI for managing customizable datasets with various field types. - Implemented record management features, including adding, viewing, deleting, and filtering records. - Developed support for many-to-one relations between Enum fields, enhancing data tracking. - Leveraged JSON for configuration and storage, ensuring data integrity and flexibility.
Rubiks Cube Architecture <i>Python, Object Oriented Programming (OOP), NumPy, pip, anaconda</i> - Built Rubix Cube structure/architecture provisioned to perform all operations defined by a real-world cube using Inheritance and Object-Oriented Programming (OOP) as precursor to a Rubik's Cube Solver - Built-in command line interface to interact with cube instance (perform operations & visualize cube)
Song Savvy <i>Python, JavaScript, Flask, React, Tailwind, SQLAlchemy</i> - Built a web-app that analyzes track metrics to predict the success of a song in the US market - Leveraged Machine Learning, utilizing a perceptron model with 88% accuracy in the back end - Designed front end app with React to allow users to interact with the model

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, PHP, Typescript, SQL, HTML/CSS, MATLAB
Frameworks: Express.js, React, Flask, Tailwind
Libraries: pandas, numpy, matplotlib, scikit-learn, scipy, SQLAlchemy, Commander.js, Inquirer.js
Technologies: Node.js, REST APIs, MySQL, Postgres, Git
